

Feng Shui Consultation Floor Plan Instructions

Draw out the shape of your home. Then, starting at the front door of your home, walk through the home and sketch out the floor plan using the example below.. The more accurate you can be, the better.

You can choose any floor of your home or you can choose to create a floor plan for all floors.

Try to be as accurate as possible so that I can position the bagua over your floor plan with better accuracy. Use a measuring tape and mark the measurements on the floor plan. If you're not able to mark the measurements of everything, at least make note of the length and width of your home.

Position the floor plan so that the main entrance to your home is along the bottom of the floor plan.

If anything is attached to your house, such as a garage, a carport, a deck or any other structure, include it in the floor plan as well.

Send your floor plan to mindfullivingint@mail.com no later than 48 hours prior to your consultation.
